

# Quick Git Commands

Remove merged branches

```
git branch --merged origin/main | rg -v "main" | xargs git branch -d
```

Make sure to test the first command before running the whole line, you don't want to accidentally delete your main branch

Prune local branches that are deleted on the remote

```
git fetch --prune
```

Properly delete a remote branch

```
git push origin delete <remote name> <branch>
```
